Paper comes in all shapes and sizes. So do our products.

Producing high quality paper is a monumental task. It takes understanding of fibers and chemicals, harmonization of processes and focus on the economics and rigidity of the business. Chemicals and equipment from Eka are made specially to meet the demands of papermaking, great or small, every day.

Our products and services are built on extensive experience in chemistry, fibers, pulp and paper production and advanced industrial IT.

With global operations close to the customer, we constantly look ahead to find innovative ways to achieve higher paper quality, process optimization, environmental performance and overall profitability.

For truly inspired papermaking, let Eka be your guide to the best choice of pulp and paper chemicals and processing solutions.
